

Supply Chain Management

BT Engage IT has been working with businesses for over 30 years providing industry leading and award-winning Supply Chain Management.

The majority of IT budgets are still spent on the procurement of IT hardware and software so providing an efficient procurement process is key in delivering an effective IT strategy.

Second best pricing or poor quality logistics can lead to significant business inefficiencies.

BT Engage IT has been working with businesses for over 30 years, providing industry leading and award winning IT hardware and software supply.

We hold strategic partnerships and leading accreditations with key vendors like HP, IBM, Lenovo, Toshiba, Microsoft, Cisco, VMware, Citrix and Symantec amongst others.

Access to these partnerships provides our customers with leading tier one pricing, better stock availability, faster quotes and in conjunction with our web-based procurement and reporting tool 'Transact', best practice around complete Supply Chain Management.

Customer benefits:

- Reduced costs through single Supply Chain Management
- Increased business efficiencies through efficient and effective procurement strategy
- Delivering best practice around supply solutions
- Reduced procurement cycle
- Achieve cost savings through access to tier one vendor pricing

"It was essential to our business that we set up an executive office in London within a three month timeframe. We needed an ICT partner who we could trust and who could provide a total service from design through to implementation and support. We chose BT Engage IT and they did an excellent job."

Rob Jongstra,
Infrastructure Manager,
Nyrstar

Transact

We have invested in an industry recognised, web-based, no-cost procurement tool 'Transact', which helps drive business efficiencies throughout procurement and business processes.

Transact has been designed as a business tool to empower individuals and provide information and reporting to support the decision making process.

Transact can streamline complex paper based business processes and reduce administration costs associated with procuring product and services. Transact can locate product information, request quotes, place orders, track orders, view shipping notes, invoices, credit notes and print electronic copy documents.

Transact also includes a sophisticated reporting tool producing real-time account statements, serial numbers, software consumption, cost centre and purchase statistics. The whole emphasis is around empowering people with information and releasing time for strategic tasks.

Transact business benefits:

- Procurement bundles: enforcing standards, helping to reduce errors and returns
- Product availability and detailed product information
- Order authorisation process: workflow and purchasing limits
- Reporting and documentation management: full history and reporting tool
- Fully customisable to allow functionality for your business processes
- Powerful search and compare tools

IT solutions portfolio

The BT Engage IT solutions portfolio enables us to work with clients to deliver an end-to-end capability to meet their business needs.

Our approach

Our objective is to deliver true business value and efficiencies within our clients businesses. Our combined capabilities and consultative approach ensures that they can deliver against cost and productivity demands, keeping their businesses competitive in rapidly changing markets.

Our strategic partners

We maintain a position of independent consultant and advisor to our clients, whilst holding strategic alliances and partnerships with key technology companies in the marketplace. This independence allows us to tailor the technology into solutions and services that achieve our clients' business challenges and maximise IT efficiencies.
